EDUCATION

University of Toronto — Computer Science - Bachelor of Science - 3.54 GPA - **12x Hackathon Winner** 2028

EXPERIENCES

Software Engineer Intern

May 2026 – Present

Aucctus AI (full-time)

Toronto, Canada

- Designed from scratch a **2D sketches to 3D model** pipeline, optimized AI pipelines for **F500 clients**
- Saved \$1.5K/month** on storage and retrieval by creating a file ingestion system via Gemini Files API
- Built a seven-stage **Celery** pipeline that sends artifacts over **WebSockets**, cutting load time **by 80%**
- Implemented a source-grounding step to filter unverified claims, lower hallucinations from **10% to 1%**
- Migrated Hotjar to **PostHog** analytics, tracking **200+** product-wide events to evaluate users' engagement

Software Engineer Intern

May 2026 – Present

The Energy Bridge (part-time)

Vienna, Austria

- Owned the landing page and platform, **66 pages, 34 Postgres tables, 26 features** as a **sole engineer**
- Designed a RAG assistant with **3 pgvector searches**, serving **2K+ users** with **sub-1s** retrieval latency
- Guarded PRs with **800+ unit** and **Playwright e2e tests**, coverage thresholds, and a **5-stage CI pipeline**

Founder

Feb 2026 – Present

SOON

Toronto, Canada

- Established a community, bringing **50+ people** to a **\$3M+ mansion** to build projects for companies
- Achieved **1K+ monthly visitors** on our website, **\$20K+** sponsorships, **300K+ views** across social media

AI/ML Intern

June 2026 – August 2026

KNOWIDEA (part-time)

Toronto, Canada

- Built an **agent harness** with **Hermes LLM agent** to turn inbound emails into tailored reports
- Cut research token cost **\$1.8 → \$1.2/run** by implementing cache, result deduplication, and URL validation
- Enhanced **security** using HMAC webhooks, short-lived scoped tokens, and strict per-user data isolation

Software Engineer

Jan 2026 – Apr 2026

University of Toronto

Toronto, Canada

- Developed a real-time chat platform for in-lecture Q/A in a team of 6 using **Next.js/TypeScript**, and **Socket.IO**, enabling **100+ live users** per lecture session with **sub-100ms** message latency
- Integrated UofT SSO authentication for up to **80K+ students**, minimizing manual account creation
- Architected **Redis** caching and rate limiting system, reducing average API response latency **by 20%**

Software Tech Lead

Aug 2025 – Apr 2026

UofT Blueprint + Toronto Crisis Center

Toronto, Canada

- Led **8 developers**, organized development tickets to create a volunteer management app for **TRCC**
- Deployed Next.js/TypeScript app with **Docker** and **CI/CD** pipelines, cut deployment failures **by 50%**
- Enforced **80% test coverage** (Vitest), built integration test structure, and added Husky commit hooks

PROJECTS

Spark (hackathon 1st place) Swift / ARKit / TypeScript / Next.js / Python / Three.js

- Built a rover that follows user, turns surroundings into **3D Gaussian-splat environment**, extended **open source** project to stream LiDAR, depth, camera poses, and audio over wifi to local server for real-time reconstruction

KingView (hackathon winner) TypeScript / Next.js / React.js / Node.js / Three.js

- Construction impact visualizer; selected to pitch a 3D urban planning platform to the **Mayor of Kingston**

Omni (hackathon 1st place at Google) Python / FastAPI / Google ADK / Gemini

- Orchestrated a **5-layer agent RAG** pipeline using **Google ADK** to detect supply chain disruptions

TECHNICAL SKILLS

Languages: Python, JavaScript/Typescript, Java, C, SQL, HTML/CSS

Frameworks: Spring Boot, Node.js, Next.js, Django, React.js, FastAPI, Flask, Tailwind CSS, Vitest, JUnit, PyTest

Technologies: Git/Github, PostgreSQL, MongoDB, Supabase, AWS, Google Cloud Platform, Apache Kafka, Docker
